# **InfraBeat**

## Digital Transformation with **SHIFT**

InfraBeat played an instrumental role in this transformation by leveraging SHIFT, a SAP Certified Partner Packaged Solution for S/4HANA Conversion. SHIFT helped the client to seamlessly integrate all business functions across its global operations, leading to improved efficiency, visibility, and decision-making.

A leading Indian pharmaceutical company with a global reach, specializing in the development, manufacturing, and marketing of biopharmaceutical products.

### **Challenges**

- · Order picking and fulfillment issues
- Inventory accuracy, tracking, and visibility
- Warehouse space and layout challenges
- Redundant manual processes
- Product diversification complexities
- Optimization of product picking
- Managing demand fluctuations

#### **InfraBeat Solution**

- Leveraged "SHIFT" SAP Certified Partner Packaged Solution for S/4HANA Conversion
- Introduced single barcode label for inventory/material movement
- Implemented a single screen for all warehouse activities
- Automated inventory management and WMS posting processes
- Implemented role-based access to business processes
- Integrated printers and weigh machines with SAP system
- $\bullet$  Implemented notification and error handling at every stage
- Introduced barcode scanners and tabs for improved efficiency
- Conversion of materials using standardized procedures

## **Key Achievements**

Optimization of Warehouse Operations and Inventory Management

Streamlined Procure-to-Pay Process with Real-Time Tracking and Approvals

Improved Master Data Maintenance with Enhanced Customer Experience

RFQ Process Automation for Efficiency and Cost Reduction

Enhanced Transportation Management with Automated Cost Calculation

Overall Efficiency and Cost Savings Achieved through ECC to S/4 HANA Conversion
